Mexican Price List

IMPORTING AGENTS FOR Orquideas, S. A., Monte Himalaya 520, Mexico, D. F., Mexico.

On the plants listed all prices are F.O.B. Mexico City, Mexico. Shipment can be made in 15 to 30 days after the exporter receives the order from us.

All plants are guaranteed to be first class, blooming size and in good condition. Any plant that arrives dead will be replaced, providing that you allow us to ship by Air Express. All plants will be imported through Brownsville, Texas.

By ordering plants through us you do not need an import permit and you are free of all details with United States Customs. We do not charge for our importing services. As soon as we receive your order and payment we send it to our exporter in Mexico with instructions. All plants after they have reached the port of entry and have been cleared will be forwarded by our agents direct to you via Air Express Collect, C.O.D. for the transportation and customs charges.

Our responsibility to the customer is to see that he receives the plants that he orders. We will not in any way be responsible for an order that the customer gives direct to the exporter.

No orders under \$10.00 will be accepted. We recommend that you order \$25.00 worth of plants and over as this will be a greater saving on transportation charges per plant. Payment for plants should be sent with order direct to us. No plants will be shipped C.O.D.

Air Express from Mexico City to Brownsville is approximately 18¢ per lb. under 100 lbs. and 11¢ per lb. over 100 lbs. Plants will weigh from about 6 oz. to 1 lb. depending on the specie or hybrid. You pay for the plants in advance and when you receive them you pay the transportation and customs charges.

In the event that certain species or hybrids may be unobtainable due to causes beyond our control please state whether you wish plants of equal value to be substituted or if you wish your money refunded on these plants.

Any customer who wishes to cancel his order must allow us 15 days to contact our exporter. In the event that the shipment is already in transit at the time the exporter receives the cancellation the customer will be responsible for the plants and will have to accept them when they arrive. We will be unable to make a refund in this case.

COLLECTIONS

For convenience of our customers we are listing collections of various genera, which are composed of flowering size plants:

Collection No. 1: Outdoor collection. In this collection we include

plants which can be grown under lath houses or under trees in Florida or California, providing temperature in winter does not fall below 35° Fahr.

50 Assorted plants per lot, \$50.00.

Varieties included: Laelia Anceps, L. Autumnalis, L. Albida, L. Acuminata, Brassavola Glauca, B. Nodosa, Oncidium Tigrinum, O. Maculatum, Odontoglossum Citreum, Odon. Laeve, Odon. Cordatum, Odon. Rossi, Odon. Cervantessi and others.

Collection No. 2: Oncidiums, of the various Mexican varieties.

50 Assorted plants, per lot, \$50.00.

Collection No. 3: Odontoglossums, of the various Mexican varieties.

50 Assorted plants, per lot, \$50.00.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that this is crucial for ensuring transparency and accountability in the organization's operations.

2. The second part outlines the various methods and tools used to collect and analyze data. It mentions the use of both traditional and modern techniques, highlighting the need for continuous improvement in data management practices.

3. The third part focuses on the role of technology in enhancing data collection and analysis. It discusses how advanced software and hardware can streamline processes and provide more accurate and timely information.

4. The fourth part addresses the challenges associated with data collection and analysis, such as data quality, security, and privacy. It offers strategies to overcome these challenges and ensure the integrity of the data.

5. The fifth part concludes by summarizing the key findings and recommendations. It stresses the importance of a proactive approach to data management and the need for regular updates and improvements.

6. The sixth part provides a detailed overview of the data collection process, from initial planning to final reporting. It includes a step-by-step guide to help organizations implement effective data collection strategies.

7. The seventh part discusses the importance of data security and privacy. It outlines the necessary measures to protect sensitive information and comply with relevant regulations.

8. The eighth part explores the various applications of data analysis in different industries. It provides examples of how data can be used to optimize operations, improve customer service, and make strategic decisions.

9. The ninth part offers practical tips and best practices for data collection and analysis. It covers topics such as data cleaning, validation, and visualization, providing actionable advice for organizations.

10. The tenth part concludes the document by reiterating the importance of data in driving organizational success. It encourages organizations to embrace data-driven decision-making and to continuously seek ways to improve their data management practices.

Odontoglossum	Laeve, beautiful brown and lilac purple.....	\$ <u>1.25</u> each
"	Pulchellum, white "Lily of the Valley Orchid"	1.25
"	Leucochilum, green, brown and white.....	1.50
Oncidium	Incurvum, many flowers small rose pink.....	1.25
"	Ornithorynchum, many spikes, rose pink.....	3.00
"	Tigrinum, fine variety, large fragrant yellow.....	3.00
"	" Unguiculatum, smaller flowers.....	1.00

CATTLEYA SPECIES

Plants of 4 to 7 bulbs and 1 lead, some bulbs with leaves others without. Large quantities of these plants are available, particularly Cattleya Gigas which Orquideas grows in the thousands, as it is considered one of the best, because of its large flowers, which are as good or better than many hybrids. 25% discount will be allowed on orders for 100 or more Cattleya specie plants. These plants are grown in clay pots.

	prices according size and types
Cattleya Gaskelliana, large well shaped flowers..	\$ 5.00 to 10.00
Cattleya Gigas, largest of Cattleya species, flowers six to ten inches across.....	4.00 to 50.00
(figure on basis of 80¢ per bulb)	
Special varieties.....	10.00 to 100.00
(figure on basis of \$2.00 per bulb)	
Cattleya Lueddemaniana, large, bold flowers some- times twice yearly.....	4.00 to 25.00
(figure on basis of 80¢ per bulb)	
Cattleya Mendellii, large, well shaped flowers...	6.00 to 20.00
(figure on basis of \$1.20 per bulb)	
Cattleya Mossiae, Easter Cattleya.....	6.00 to 25.00
(figure on basis of 70¢ per bulb)	
Cattleya Percivaliana, medium size flowers, blooming in Winter.....	4.00 to 15.00
Cattleya Schroederae, delicate pale color, very fragrant.....	5.00 to 10.00
Cattleya Trianae, fine winter Cattleya.....	4.00 to 50.00
(figure on basis of 70¢ per bulb)	

ODONTOGLOSSUMS

These plants require growing temperatures of around 65 to 75° Fahr. and a night temperature of 45 to 60° Fahr. and unless you have special facilities like air conditioned greenhouses, or your summer temperatures are low and you keep them in cool growing condition, we do not recommend them to inexperienced amateurs or growers. A large number of this genera, both in species and hybrids are grown by Orquideas. Their collection consists of over fifteen thousand plants. We quote only on a few of the species, for growers wishing to experiment with them, and then go into hybrids, which are extremely beautiful. These plants are grown in clay pots. Quotations on hybrids will be sent on request.

Odontoglossum	Crispum.....	\$ 4.00 to 5.00 & up
"	Pescatorei.....	4.00 to 5.00 & up
"	Luteo purpureum.....	4.00 to 5.00 & up
"	Gloriosum.....	4.00 to 5.00 & up

[illegible]

HYBRIDS OF CATTLEYA AND ALLIED GENERA

During the war Orquideas were extremely fortunate in receiving some very large consignments of plants from some of the very best growers in England.

Plants offered are mostly seedlings which will bloom from their next growth, and have from 4 to 7 bulbs. Include some of the yellow and bronze types, and you will find them exceptional, as the flowers from some of these seedlings that have bloomed have been outstanding. These plants are grown in clay pot.

Our classification on the hybrids, is somewhat as follows:

B. Medium size plants, the largest bulb and leaf over 19 centimeters (8 inches) and should bloom from next growth.

C. Larger plants than B, with more bulbs, and should bloom from next growth.

	B	C
C. Susan Alba A. M. x Blc. Nanette.....	\$ 10.00	\$
C. Dupreana x Lc. Wellsiana.....	10.00
